February 4, 2010

Dear Growers,

Attached, please find the 2009 Post Harvest Test (PHT) inspection results for certified seed potatoes. Read the disclaimer preceding the list. This is a comprehensive list of all submitted seed lots passing Post Harvest Test tagging tolerances of combined 10% total virus as specified in Colorado Rules and Regulations for Certification of Seed Potatoes. If you purchased a seed lot prior to PHT results and it is not listed here, contact your seed supplier.

The exception to this listing refers to Canela Russet. Due to its dormancy, this cultivar did not emerge uniformly or normally in a PHT plot. Sales and replant of Canela Russet will be based on PHT results as they are available or based on 2009 summer readings. Contact Colorado Potato Certification service if you have any questions.

CERTIFIED SEED GROWERS and GROWER ENTRY Tier I and II GROWERS

PLEASE NOTE:

Seed lots planted for recertification or qualified lots for Tier II growers must meet the re-certification tolerances as defined in the Rules and Regulations:

Re-certification Tolerances	
All Generations	
<u>Disease</u>	<u>%</u>
Leafroll	1.5
Total Mosaic Allowed	4.0
Mosaic (Visually Severe)	1.0
Mild Mosaic	4.0
Other Virus	0.5
Haywire	2.0
Spindle Tuber	0
Bacterial Ring Rot	0

Planting ineligible lots will disqualify your farming operation as fully certified. Call the Potato Certification Service office if you have ANY questions.

Other Cultivar Notes: CO94035-15RU will be named Mesa Russet. NY 112 has been named Marcy

Several cultivars listed, while not identified in this document, are protected by US Patent, PVP Act, and material transfer agreement, or subject to registration fees under owner/grower contracts. It is illegal to purchase non certified seed of such cultivars. Buyers of any variety are advised to validate the status of the variety from the vendor or variety owner. Protected cultivars are duly noted on page 6-8 of the Colorado Certified Seed Potatoes 2009 Crop Directory and Field Inspection Readings.

This document is a listing of certified seed lots that are eligible for sale to the commercial industry. Be advised that the readings are an estimate only. Yield losses due to actual disease content may vary by variety and management practices. Please call the Colorado Potato Certification Service with any further questions.

Seed certification is made by the Colorado Potato Certification Service of Colorado State University (the "PCS") pursuant to Colorado law (CRS §35-27-101 *et seq.*, as amended). "Certification" of any seed by the PCS means ***only*** that:

- the seed potatoes were visually inspected while growing in the field; and
- random samples of seed potato lots were again visually inspected at a post harvest test plot in accordance with the Rules and Regulations for Certification of Seed Potatoes published by the PCS in cooperation with the Colorado Certified Potato Growers Association; and
- based on such inspections, the seed potato lots listed here were found to be in compliance with the applicable standards set forth in the Rules and Regulations.

Certification of any seed lot is not a guaranty or warranty that the certified seed lot is free from defects such as disease, rot, or other condition that may affect seed quality and ability to sprout and grow normally.

NOTICE TO SELLERS AND BUYERS OF CERTIFIED SEED – DISCLAIMER OF WARRANTIES AND LIMITATION TO DAMAGES

Colorado State University and Colorado Potato Certification Service are not sellers of certified seed and make no warranties, express or implied, of merchantability, fitness for a particular purpose or otherwise. In any event, liability for damages, regardless of the form of action, will not exceed the purchase price paid for seed lots by the Buyer. In no event will Colorado Potato Certification Service, Colorado State University, the Board of Governors, or their members, officers, employees or agents, be liable for any consequential damages.
